

ASHWIN BASIL JACOB

Data Analyst | SQL · Python · Power BI · dbt | Operations & Analytics

Kerala, India | +91 9496524829 | [linkedin.com/in/ashwin176](https://www.linkedin.com/in/ashwin176)

github.com/ashwinbasil | ashwinbasil176@gmail.com

PROFILE

- Data Analyst with 2+ years of experience building reporting systems, processing large-scale datasets, and translating operational data into decisions. Reduced processing time by 56% and prevented ~£500/week in financial losses through structured data validation and workflow redesign.
- Proficient in SQL (MySQL, PostgreSQL, BigQuery), Python (Pandas, NumPy), Power BI, Tableau, dbt, and Advanced Excel. Experienced building ETL pipelines, KPI dashboards, and analytics engineering projects across 30M–100M+ record datasets.

CORE SKILLS

Data & Analytics: SQL (MySQL, PostgreSQL, BigQuery), Python (Pandas, NumPy), Power BI (Power Query, DAX), Tableau, dbt, Excel (Advanced), ETL Pipelines, Data Validation, Git/GitHub

Reporting & Ops: KPI Development, MIS Reporting, Reconciliation, Root Cause Analysis, Process Improvement, Operational Dashboards, Audit-Ready Reporting, Data Governance

Business: Stakeholder Communication, Cross-Functional Collaboration, Trend Analysis, Statistical Analysis, Demand Planning

EXPERIENCE

Receiver / Cross Trainer (Promoted from Team Member within 7 months)

Apr 2023 – Jan 2026

Shake Shack, London, UK

- **Reconciliation:** Managed end-to-end reconciliation of inventory, delivery, and invoice records across **4 daily supplier deliveries**, resolving **2–3 discrepancies per shift** including quantity mismatches and invoice variances within defined SLAs.
- **Reporting:** Built Excel-based KPI trackers, reconciliation logs, and performance dashboards used by management for daily operational decision-making.
- **Process Improvement:** Redesigned validation workflows, reducing processing time by **56%** (45 to 20 min) and preventing **£500/week** in financial losses through structured data validation and root cause analysis.
- **Stakeholder Coordination:** Worked with **5–7 suppliers** and cross-functional teams to investigate exceptions and drive resolution within operational timelines.

PROJECTS

NYC 311 Operations Analysis SQL (BigQuery), dbt, Python, Power BI | [GitHub](#)

- Built an analytics engineering pipeline on 30M+ city service requests using BigQuery and dbt (staging, intermediate, mart layers); delivered a Power BI dashboard tracking agency resolution times, SLA breach risk, demand trends, and borough-level performance. Documented data quality decisions including COVID-period deterioration and storm-event volume spikes.

Workforce Data Quality & Governance Framework SQL, Python, Power BI | [GitHub](#)

- Validated 3,000+ workforce records using SQL and Python; built SOP-driven quality checks classifying failures by severity and delivered a Power BI governance dashboard tracking failure rates, SLA breaches, and regional data quality status.

F1 Telemetry & Race Strategy Analytics Python, FastF1, DuckDB, Plotly | [GitHub](#)

- Analysed telemetry across 20+ drivers, 8 races, and 2 seasons (2023–2024); built a physics-validated thermal degradation model, Monte Carlo pit strategy optimizer (725 scenarios), and a live interactive dashboard published on GitHub Pages.

Mean Reversion Signal Backtesting Python, Pandas | [GitHub](#)

- Built a modular backtesting pipeline with Sharpe ratio, max drawdown, and cumulative return metrics; parameter sensitivity analysis and strategy vs. benchmark comparison across multiple equities.

CERTIFICATIONS & DEVELOPMENT

• **Data Science & GenAI Fellowship** — Crio.do

Jan 2026 – Present

• **NLP Specialization** — DeepLearning.AI

Jan 2026 – Present

• **Google Data Analytics Specialization** — Google / Coursera

Oct 2022

• **Prepare, Clean, Transform & Load Data using Power BI** — Coursera (80.95%)

Oct 2022

EDUCATION

MSc Data Analytics, De Montfort University, Leicester, UK

2022 – 2023

BSc Mathematics, Mahatma Gandhi University, Kerala, India

2019 – 2022
